

# M.H Mix

## BUILD MORE, SAVE MORE

M.H. Mix is a high quality powder additive from Germany that enhances the dispersion, pliability, adhesiveness and durability of normal Portland cement. The result is less shrinkage and cracks with excellent workability for a variety of building use. It is economical and easy to use for maximum cost effectiveness.

**Construct  
better  
buildings  
with  
M.H Mix**

### Product properties:

Colour:	White
Binder:	Additive for cement compatibility
Additive:	Plasticizer to improve adhesion and workability properties
Safety precaution:	Wash with lots of water if contact with eye. Seek medical advice if symptoms persist.
Toxicity:	Non-toxic
Origin:	Raw material from Germany

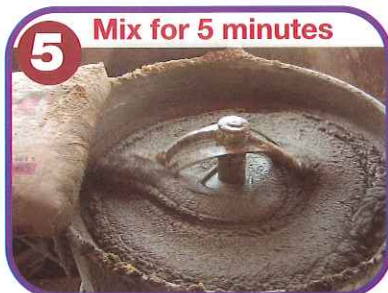

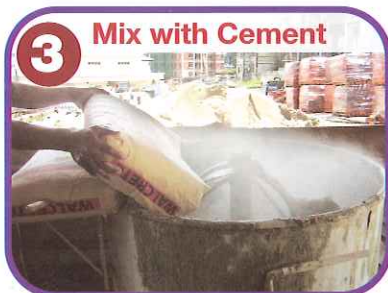

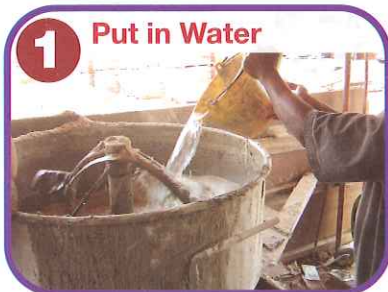

### Mix ratio

Water	30 liters (6 plaster pails)
M.H Mix	100 g
Portland cement	50 kg
Fine sand (plastering grade)	200 kg (40 scoops)

#### Note:

1. Recommended mixing time should be 5 minutes & above for optimum homogenized mortar.
2. Use only according to recommended dosage. Too high dosage may cause retarding effect to cement mortar.

\*Best for baked clay bricks, plasters and brick laying mortar

### Benefits:-

- Strong bonding
- Low drying shrinkage
- Reduced shrinkage cracks
- Good workability
- Easy handling
